

# Curriculum vitae

## Stefano Berti

ULR 7512 – Unité de Mécanique de Lille Joseph Boussinesq (UML)

Avenue Paul Langevin, Cité Scientifique

59650 Villeneuve d'Ascq, France

tel.: +33320434618

email: stefano.berti@polytech-lille.fr

web: [bertistefano.eu](http://bertistefano.eu)

## Personal details

---

Born on June 16, 1976 in Rome, Italy.

## Present position

---

13/1/2023 Habilitation à Diriger des Recherches (HDR) in Mechanics, Université de Lille.

since 2012 Associate Professor at Département de Mécanique, École Polytechnique Universitaire (EPU) de Lille, Université de Lille.

## University studies

---

2003-2006 PhD in Physics, Università di Torino (Italy) and Université de Nice - Sophia Antipolis (co-tutoring program). Thesis: “Non-Newtonian turbulence: viscoelastic fluids and binary mixtures”.

2003 Master in Physics, Università di Roma “Sapienza” (Italy).

## Research experience

---

2011-2012 Postdoc researcher at Laboratoire de Météorologie Dynamique, ENS, Paris (funding by CNRS, CNES).

2008-2010 Postdoc researcher at Laboratoire Interdisciplinaire de Physique, UJF, Grenoble (funding by CNRS).

2007 Postdoc researcher at Helsinki University (funding by TEKES - Finnish Academy for Applied Sciences).

## Collective responsibilities

---

since 2023 Correspondent of UML (Unité de Mécanique de Lille) for zero-carbon actions of Université de Lille

since 2019 Member of the Laboratory Council of UML, Lille.

since 2016 Organizer of UML seminars, Lille.

- since 2016 Co-coordinator of Master 2 internships (Department of Applied Mechanics) and last year internships in Mechanical engineering (EPU), Université de Lille.
- 2016-2018 Member of the pool of Selection Committees of CNU section 60, Université de Lille.
- 2015 Member of the evaluation committee of PhD theses, Laboratoire de Mécanique de Lille (LML), Lille.
- 2009 Organizer of the seminars of DYFCOM group, Laboratoire Interdisciplinaire de Physique, Grenoble.

## Grants and participation to funded projects

---

- 2022-2023 Participation to CNRS LEFE project *Dynamique côtière à sous-mésoéchelle caractérisée par des mesures Lagrangiennes*. PI: A. Sentchev (Univ. du Littoral Côte d'Opale).
- 2020-2023 Participation (co-PI) to CNES project *Data and dynamical synergies for SWOT (DIEGO)*. PI: A. Ponte (Ifremer, Brest).
- 2016-2019 Participation to CNES TOSCA project *New dynamical tools for submesoscales characterization in SWOT data*. PI: G. Lapeyre (CNRS, ENS, Paris).
- 2014-2018 Participation to ANR JCJC project *SEAS (Sea-ice Evolution in Arctic Summer)*. PI: E. Calzavarini and S. Hirata (Univ. Lille).
- 2013 Projet BQR (Bonus Qualité Recherche) - Emergence, Univ. Lille *Transport and mixing in viscoelastic fluids*.

## Organization of scientific meetings

---

- 2022 Annual meeting of GDR Navier-Stokes 2.00, Lille.  
Member of the local organizing committee.
- 2018 CNRS summer school "Active Transport in the Ocean: Turbulence, Chemistry and Biology", Wimereux.  
Organizer in collaboration with F. G. Schmitt (CNRS, Wimereux) and E. Calzavarini (Univ. Lille).
- 2016 "51ème Congrès annuel du Groupe Français de Rhéologie" (in association with the Belgian Society of Rheology), Lille.  
Member of the local organizing committee.
- 2015 "International Conference on Mechanics of Complex Solids and Fluids", Lille.  
Member of the local organizing committee.

## Research activity

---

- since 2005 *Reaction-transport systems, applications to population dynamics*.
- since 2005 *Turbulence and transport in complex fluids*.
- since 2011 *Turbulent transport, Lagrangian dispersion and applications in oceanography*.

**Referee for the journals:** Physics of Fluids, Journal of Fluid Mechanics, Physical Review Fluids, Journal of Non-Newtonian Fluid Mechanics, Theoretical and Computational Fluid Dynamics, European Physical Journal E, European Physical Journal Plus, Europhysics Letters, Physica D, Journal of the Royal Society Interface, Water, Journal of Atmospheric and Oceanic Technology, Journal of Geophysical Research: Oceans, Journal of Physical Oceanography, Nature Scientific Reports, Nature Communications.

**Referee for the funding agencies:** Programme National CNRS LEFE (Les enveloppes fluides et l'environnement), Dutch Research Council NWO (Netherlands), Programme National de Recherche ARC (Belgium).

## Supervision of students

---

### PhD students

- since 2021 M. Maalouly, Université de Lille. *Project:* Lagrangian particle dynamics in ocean submesoscale turbulence and future satellite data. In collaboration with G. Mompean (Univ. Lille).
- 2018-2021 V. Tergolina, Université de Lille. *Project:* Phytoplankton vertical dynamics in the presence of advection. In collaboration with E. Calzavarini and G. Mompean (Univ. Lille).
- 2018-2021 A. Jaccod, Sorbonne Université. *Project:* Direct Numerical Simulation of complex multiscale flows. In collaboration with S. Chibbaro (Univ. Paris Saclay).
- 2015-2019 D. Canossi, Université de Lille. *Project:* Numerical simulation of the transition to elastic turbulence in viscoelastic inertialess flows. In collaboration with G. Mompean (Univ. Lille).
- 2015-2018 H. Garg, Université Lille. *Project:* Particle laden inhomogeneous elastic turbulence. In collaboration with E. Calzavarini and G. Mompean (Univ. Lille).

### Master students

- 2022-2023 A. Dekens (M2, ENS, Paris). Collaboration with G. Lapeyre (CNRS, ENS, Paris).
- 2022-2023 Y. Malem (M2, Univ. Lille). Collaboration with E. Calzavarini (Univ. Lille).
- 2022-2023 Z. Hou (M2, École Centrale, Lille). Collaboration with F. Romanò (ENSAM Lille).
- 2022-2023 G. Carcanade (5th year Centrale Supélec, Paris Saclay). Collaboration with G. Lapeyre (CNRS, ENS, Paris).
- 2021-2022 Z. Hou (M1, École Centrale, Lille). Collaboration with E. Calzavarini (Univ. Lille) and F. Romanò (ENSAM Lille).
- 2020-2021 R. Gandhi (M2, École Centrale, Lyon). Collaboration with E. Calzavarini (Univ. Lille) and F. Romanò (ENSAM Lille).
- 2020-2021 E. Chardon Legrand (M1, Univ. Lyon). Collaboration with G. Lapeyre (CNRS, ENS, Paris).
- 2019-2020 Y. Jiang (M2, École Polytechnique Fédérale de Lausanne, Switzerland). Collaboration with E. Calzavarini (Univ. Lille) and F. G. Schmitt (CNRS, Wimereux).
- 2018-2019 S. Medlej (M2, École Polytechnique, Paris).
- 2017-2018 A. Mahdy (M1, École Centrale, Lille).

- 2013-2014 D. Canossi (4th year EPU, Lille). Collaboration with G. Mompean (Univ. Lille).
- 2013-2014 K. Allaoua, (M2, Univ. Lille). Collaboration with E. Calzavarini and S. Hirata (Univ. Lille).

## Scientific stays

---

- 2022 Visiting researcher at MISU, Department of Meteorology - Stockholm, Sweden (invited by I. Koszalka, 19-26/11/2022).
- 2021-2022 Visiting researcher at the Physics Department of Turin University, in the framework of a CRCT leave (collaboration with G. Boffetta and S. Musacchio, period: 1/9/2021-30/6/2022).
- 2018-2021 Invited researcher at Laboratoire de Météorologie Dynamique, ENS, Paris (collaboration with G. Lapeyre, periods: 13/11/2018-12/11/2019 and 13/11/2019-12/11/2020).
- March 2006 Visiting junior researcher at IFISC (Institute for Cross-Disciplinary Physics and Complex Systems), Palma de Mallorca, in the framework of a MEC-MIUR program of collaboration between Italy and Spain.

## Invited talks

---

- “Relative dispersion at ocean submesoscales from drifter data and idealized turbulence models”, MISU, Department of Meteorology - Stockholm, Sweden (2022).
- “Finescale turbulence and mixed-layer dynamics: implications for Lagrangian dispersion”, FilaChange - From filaments to climate change, Paris (2022).
- “Lagrangian dispersion in quasi two-dimensional models of ocean submesoscale turbulence”, Dipartimento di Fisica, Università di Torino, Italy (2022), Laboratoire Interdisciplinaire de Physique, Grenoble (2022), Laboratoire de Mécanique des Fluides, Lille (2022).
- “Lagrangian dispersion in upper-ocean turbulent models including mixed-layer instabilities”, Lille Turbulence Program - LMFL, Lille (2021), Laboratoire de Météorologie Dynamique, ENS, Paris (2020).
- “Reaction-transport systems in heterogeneous environments and population dynamics”, Namur Center for Complex Systems (naXys), Namur, Belgium (2017).
- “Lagrangian reconstructions of temperature and velocity in a model of surface ocean turbulence”, Workshop “Inversion of SWOT ocean observations” - CNES, Toulouse (2014).
- “Lagrangian transport: applications to ocean dynamics”, Laboratoire d’Océanologie et de Géosciences, Wimereux (2014).
- “Lagrangian reconstructions of tracer fields in numerical simulations of upper ocean turbulence”, Istituto di Scienze dell’Atmosfera e del Clima, CNR, Rome, Italy (2012).
- “Reaction-diffusion approach to combustion dynamics in a steady compressible flow”, Institut Jean le Rond d’Alembert, Sorbonne Université, Paris (2010).
- “Combustion dynamics in steady compressible flows”, Rencontres Niçoises de Mécanique des Fluides - Laboratoire J. A. Dieudonné, Nice (2009).

- “Turbulence in viscoelastic fluids”,  
Laboratoire de Spectrométrie Physique, Grenoble (2007).
- “Phase separation in two-dimensional flows”,  
Department of Mathematics, Helsinki University, Finland (2006).
- “Small scale statistics in viscoelastic turbulent flows”,  
IFISC, Palma de Mallorca, Spain (2006).

## Other seminars

---

- “Surface light modulation by sea ice and phytoplankton survival in a convective flow model”,  
Euromech colloquium - Complex particles in turbulent flow, Nice (2023).
- “Light-limited dynamics of sinking phytoplankton in a convective flow model with ice-covered waters”,  
EGU General Assembly - Nonlinear Processes in Geophysics, Vienna, Austria (2023).
- “Phytoplankton-zooplankton dynamics in 3D turbulent flows behind an idealized island”,  
vEGU General Assembly - Nonlinear Processes in Geophysics (2022).
- “Lagrangian pair dispersion in upper-ocean turbulent flows with mixed-layer instabilities”,  
vEGU General Assembly - Nonlinear Processes in Geophysics (2021).
- “Lagrangian pair dispersion in generalized two-dimensional turbulence”,  
17<sup>th</sup> European Turbulence Conference, Turin, Italy (2019).
- “Relative dispersion in quasi-geostrophic models of upper-ocean turbulence”,  
7<sup>th</sup> Lagrangian Analysis and Prediction of Coastal and Ocean Dynamics meeting, Venice, Italy (2019).  
4<sup>th</sup> Xiamen Symposium on Marine Environmental Sciences, Xiamen, China (2019).
- “Relative dispersion in direct cascades of generalized two-dimensional turbulence”,  
Euromech/Ercoftac colloquium – Turbulent cascades II, Lyon (2017).
- “Effects of discreteness on population persistence in an oasis”,  
Fluid active matter symposium, ICTAM 24, Montreal, Canada (2016).
- “Lagrangian reconstructions of temperature and velocity in surface ocean turbulence”,  
IUGG General Assembly - Physical Oceanology (Sub-Mesoscale Eddies), Prague, Czech Republic (2015).
- “Relative dispersion and turbulence in the Southwestern Atlantic Ocean from drifters data”,  
8<sup>th</sup> Chaotic Modeling and Simulation International Conference, Paris (2015).
- “Lagrangian reconstructions of surface ocean turbulence”,  
14<sup>th</sup> European Turbulence Conference, Lyon (2013).
- “Lagrangian reconstructions of tracer fields at ocean surface”,  
EGU General Assembly - Nonlinear Processes in Geophysics, Vienna, Austria (2012).
- “Finite-scale dispersion in the southwestern Atlantic Ocean: analysis of Lagrangian drifters data”,  
18<sup>th</sup> Conference on Atmospheric and Oceanic Fluid Dynamics, Spokane, USA (2011).
- “Phenomenology of elastic turbulence in 2D polymer solutions”,  
Softflow summer school on “Complex and biofluids”, Cargese (2009).

- “Combustion dynamics in steady compressible flows”, PPF DYSCO “Dynamique des Systèmes Complexes”, Annecy (2009).
- “Phenomenology of elastic turbulence in two-dimensional polymer solutions”, Rencontre sur la Microfluidique et Fluides Complexes, Marrakech, Morocco (2008).
- “Elastic turbulence in 2D viscoelastic flows”, 11<sup>th</sup> European Turbulence Conference, FEUP, Porto, Portugal (2007).

## Teaching activity

---

- since 2012    Université de Lille (MCF)  
 Mechanics Department, EPU:  
 3rd year: Informatics (lab work), Numerical methods for engineers (course, exercise classes and lab work), Mathematical tools for engineers (exercise classes); 4th year: Thermodynamics (course and exercise classes); 5th year: Mechanics of viscous fluids and turbulence (course and exercise classes).  
 Bachelor in Mechanics: Lagrangian and Hamiltonian mechanics (course and exercise classes), Applied mechanics (course and exercise classes), Applied fluid mechanics (course and exercise classes), Continuum mechanics (fluids) (exercise classes), Thermodynamics (exercise classes).  
 Master 1 in Mechanics: Constitutive laws (fluid mechanics) (exercise classes).  
 Master 2 in Mechanics: Complex fluids (course), Thermal transfers (course), Turbulence (course).  
 Monitoring of assistant-engineer internships (mechanics) (4th year EPU), mechanical engineering final-project internships (5th year EPU), Master 2 internships in applied mechanics; 2 internships of each type per year on average.
- 2009            Université Grenobles Alpes (temporary lecturer)  
 Bachelor, Department of Electricity and Industrial Informatics of Institut Universitaire de Technologie (IUT 1): Electricity and magnetism (course and exercise classes).

## Science popularization activity

---

- 2020            Fête de la science, exhibition “Planète Nature”, High school Cousteau, Wasquehal (Lille). Stand on *Transport of plastics in the ocean*. Coordinator in collaboration with E. Calzavarini (Univ. Lille).
- 2019            Fête de la science, exhibition “A demain”, Lille. Stand on *Flowing properties of granular materials and active matter*. Coordinator in collaboration with E. Calzavarini (Univ. Lille).
- 2018            Fête de la science, exhibition “L’erreur”, Lille. Stand on *Basic mechanisms at the origin of tides*. Coordinator in collaboration with E. Calzavarini (Univ. Lille).
- 2018            Seminar for high-school students on *Turbulence*, Departments of Mathematics and of Mechanics, Université de Lille.
- 2017            Fête de la science, exhibition “Voyage(s)”, Lille. Stand on *Fluid turbulence*. Coordinator in collaboration with E. Calzavarini (Univ. Lille).
- 2016 & 2017    Seminar for high-school students on *Chaos and complexity in fluid dynamics*, Departments of Mathematics and of Mechanics, Université de Lille.

- 2016 Fête de la science, exhibition “Cycle(s) de vie”, Lille. Stand on *Swimming microorganisms*. Coordinator in collaboration with E. Calzavarini (Univ. Lille).
- 2015-2016 Project on initiation to research (TIPE) for French high-school students. Lycée Mariette, Boulogne sur Mer et Univ. Lille. *Student*: A. Ohier. *Title*: Numerical weather forecasting. Research partner.
- 2015 Fête de la science, exhibition “Climat(s)”, Lille. Stand on *Fluid mechanical aspects of the climatic system*. Coordinator in collaboration with E. Calzavarini (Univ. Lille).
- 2008 & 2009 Fête de la science, exhibition “Fluides complexes: liquides ou solides”, Grenoble. Scientific animator.
- 2006 Exhibition “Semplice e Complesso” organized by Istituto Nazionale di Fisica della Materia (INFN), Turin. Scientific animator.

## Articles
